Correction: Selection of reference genes for qRT-PCR examination of wild populations of Atlantic cod *Gadus morhua*

Pal A Olsvik*, Liv Softeland and Kai K Lie

Following the publication of our article[1], an error in Table 2 was noted, the wrong accession number and primer sequences were stated for the EF1A assay.

The GenBank accession number was incorrectly stated as:

EX721840

Forward primer: CCCTGTGGAAGTGGCTGAAG

Reverse primer: CATCCAAGGGTCCGTATCTCTT

The correct GenBank accession number should be:

EX722124 Forward primer: CGGTATCCTCAAGCC-CAACA Reverse primer: GTCAGAGACTCGTGGTG CATCT

We apologise for any inconvenience this may have caused.
