Correction to: Antihypertensive medication adherence and associated factors among adult hypertensive patients at Jimma University Specialized Hospital, southwest Ethiopia

Solomon Weldegebreal Asgedom^{1*}, Tesfay Mehari Atey¹ and Tigestu Alemu Desse²

Correction to: *BMC Res Notes* (2018) 11:27

<https://doi.org/10.1186/s13104-018-3139-6>

After publication of our article [1] we became aware that we had not obtained permission to reproduce the questions from the eight-item Morisky's Medication Adherence Scale. The table in this Correction replaces Table 2 in our article. In addition, the second number for the MMAS-8 question 2 was incorrect and has been updated to 223 (79.6).

The reference which is cited in the above table caption can be reviewed in our article.

Table 2 A summary of responses to the eight-item Morisky's Medication Adherence Scale [24] among adult hypertensive patients at Jimma University Specialized Hospital March 4, 2015 to April 3, 2015

MMAS-8 measurement scale questions	Frequency (%)	
	Yes	No
MMAS-8 question 1	89 (31.8)	191 (68.2)
MMAS-8 question 2	57 (20.4)	223 (79.6)
MMAS-8 question 3	27 (9.6)	253 (90.4)
MMAS-8 question 4	93 (33.2)	187 (66.8)
MMAS-8 question 5	242 (86.4)	38 (13.6)
MMAS-8 question 6	35 (12.5)	245 (87.5)
MMAS-8 question 7	141 (50.4)	139 (49.6)
MMAS-8 question 8		
Never/rarely	112 (40.0)	168 (60.0)
Once in a while	39 (13.9)	241 (86.1)
Sometimes	122 (43.6)	158 (56.4)
Usually	7 (2.5)	273 (97.5)
All the time	0 (0.0)	280 (100.0)
Adherence	Frequency (%)	
Adherent	173 (61.8)	
Non adherent	107 (38.2)

Ready to submit your research? Choose BMC and benefit from:

- fast, convenient online submission
- thorough peer review by experienced researchers in your field
- rapid publication on acceptance
- support for research data, including large and complex data types
- gold Open Access which fosters wider collaboration and increased citations
- maximum visibility for your research: over 100M website views per year

At BMC, research is always in progress.
